Tuff Flex PVC Strip Curtain Kits help save energy in walk-in coolers, freezers, and cold rooms.

- Once installed, our Tuff Flex PVC Strip Curtains will start saving money on energy immediately. When walk-ins are left open without a Strip Curtain or Clear Vu door, warm air quickly rushes in and increases cooler/freezer temperatures.
- Our Tuff Flex PVC Strip Curtains keep perishables colder and increase shelf life up to 50%, especially on items stored closer to the cooler or freezer entrance.
- Our Tuff Flex PVC Strip Curtains extend compressor life. Coil-icing and damaging frost will be minimized and the overall efficiency of your refrigeration or freezer unit will be optimized.

Tuff Flex PVC Strip Curtain Kits improve employee morale and warehouse conditions.

- Our Tuff Flex PVC Strip Curtains block out the loss of temperature-controlled air. When dock doors are open, the inside air is quickly pulled outside by natural forces and causes considerable energy loss. PVC Strip Curtains help energy consumption decrease and profits escalate.
- Our Tuff Flex PVC Strip Curtains ensure employees no longer suffer undue discomfort when temperatures skyrocket or plummet outside. Tuff Flex Strip Curtains keep heated or cooled air where it's supposed to be to keep your employees comfortable.
- Our Tuff Flex PVC Strip curtains are effective at blocking out flying insects, birds, dust and debris when dock receiving doors are open. This helps keep work environment sanitary.

Our Tuff Flex PVC Strip Curtains are ideal for walk-in coolers, walk-in freezers, warehouses, loading dock doors, truck doors, welding booths, noise barriers, laboratories and clean rooms, conveyor systems, smoking areas, barns and stables, patio doors and other applications.

Noise Barriers

- Tuff Flex PVC Strip Curtains can provide a sound-reducing barrier. Our thick .12 and .16-gauge materials with full overlap can provide noise reduction of 50+ dBA depending on the frequencies, when installed as instructed by the factory. Additional sound absorption materials may be required to maximize sound reduction. Please consult factory for more details.

Clean Rooms and Laboratories

- Tuff Flex PVC Strip Curtains can be used to restrain insects, birds, dust, debris, fumes, smoke, and other environmental contaminants in areas where sanitation is key.

Refrigerated Truck Doors

- Tuff Flex PVC Strip Curtains reduce fuel consumption up to 50% in refrigerated trucks. Deliver fresher, colder products to customers, creating a profitable and competitive edge for your business.
