

SPM Opaque Flexible Swinging PVC Doors

www.worldmanufacturing.com | Call (800) 722-3539

Shown with optional ABS Impact Plates.

Impact Hinge system for 48" wide & smaller

Gorilla Gravity Hinge system for 54" wide & larger

Technical Specifications:

- Available in .125 thick flexible, opaque PVC material.
- Solid colors create an opaque barrier between spaces.
- Polycarbonate vision light in each door panel.
- Two different hinge systems: Impact hinge system for 48" wide openings and smaller. Gorilla Gravity hinge system for 54" wide openings and larger (up to 120" W X 144" H).
- Hinges are made of noncorrosive materials. Stainless-Steel hinges available.
- Impact hinge systems are comprised of steel springs, steel fasteners, steel rods and roller-ball bearings with tension springs.
- Gorilla Gravity Hinges are comprised of steel tension springs, steel fasteners, steel rods and roller ball bearings.

Features:

- Door panels swing 180° and open with less than a pound of pressure.
- Optional ABS Impact Plates are ideal for pushcarts and heavier-traffic areas.
- Double-panel configurations allow for easy walk-through access through the center opening.
- Longer lasting and easier to walk through than strip doors.
- Extend compressor life by maintaining adequate temperature control.
- SPM panels will never drag over carried or pushed-through items.
- SPM panels are custom-made to your specifications.
- Available in brown, beige, blue, red, black, and green.
